

E-Sports App — Research & Feature Breakdown

Project: e-scores — Live Esports Tracker

Stack: Next.js 16 · React 19 · TypeScript · Tailwind CSS 4 · PandaScore API

Date: 2026-03-25

1. Competitor & Platform Analysis

Platform	Strengths	Key Takeaway
HLTV.org	Deep CS2 stats, player ratings, event coverage	Detailed match pages with round-by-round data, HLTV rating system
Liquipedia	Wiki-style multi-game coverage, bracket visuals	Comprehensive team/player history, tournament bracket formats
FACEIT	Tournament hosting, matchmaking, ladder system	Registration flow with team management and anti-cheat integration
Battlefy	Self-serve tournament creation, bracket engine	Flexible bracket types (Swiss, double-elim, round-robin)
Strafe	Mobile-first live scores, push notifications	Clean scoreboard UI with real-time updates, spoiler-free mode
VLR.gg	Valorant-focused, community threads, player transfers	Match page economy/ability breakdowns, roster change tracking
PandaScore	Multi-game API, structured data	<i>Our primary data source</i> — live scores, tournaments, teams, players

2. Feature List

Core Features (🟩 = Exists, 🟨 = Planned/Missing)

Data & Content

#	Feature	Status	Description
F1	Live Match Tracking	🟩	Real-time scores with 15s auto-refresh
F2	Tournament Browser	🟩	Active/upcoming/past tournaments, tier filtering (S/A/B/C/D)
F3	Team Profiles	🟩	Roster, match history, win rates
F4	Player Profiles	🟩	Career stats, current team, match history
F5	Match Details	🟩	Game-by-game scores, streams, opponent info
F6	Esports News	🟩	Aggregated news feed with search
F7	Tournament Registration	🟨	Register a team/solo for a tournament with confirmation flow
F8	Live Scoreboard View	🟩	Dedicated real-time scoreboard with round/map progression
F9	Player Stats Dashboard	🟩	Advanced stats: KDA, win-rate trends, performance graphs
F10	Tournament Brackets	🟩	Visual bracket tree (single/double elimination, Swiss)

Navigation & UX

#	Feature	Status	Description
F11	Global Search (⌘K)	✅	Quick-search across teams, players, tournaments, matches
F12	Game Filtering	✅	Filter all content by game title
F13	Dark / Light Theme	✅	System-aware with manual toggle
F14	Multi-language (i18n)	✅	EN, TR, DE, ES, FR
F15	Responsive Layout	✅	Mobile-first design
F16	Pagination	✅	Paginated list views

Future Enhancements

#	Feature	Status	Description
F17	User Accounts & Auth	✅	Sign up/in, save favorites, follow teams/players
F18	Push Notifications	✅	Match start, score updates, tournament reminders
F19	Streaming Integration	✅	Embedded Twitch/YouTube streams on match pages
F20	Betting Odds Display	✅	Pre-match odds comparison
F21	Social Sharing	✅	Share match results / tournament links

3. Screen List

Current Screens (Already Implemented)

#	Screen	Route	Description
S1	Homepage Dashboard	/	Hero section, live matches, featured tournaments, quick nav
S2	Matches List	/matches	Filterable list of live/upcoming/past matches
S3	Match Detail	/matches/[id]	Game-by-game scores, teams, streams, opponent info
S4	Tournaments List	/tournaments	Browse tournaments by status and tier
S5	Tournament Detail	/tournaments/[slug]	Tournament info, schedule, participating teams
S6	Teams List	/teams	Browse all teams with game filter
S7	Team Detail	/teams/[slug]	Roster, stats, match history, tournament records
S8	Players List	/players	Browse all players with game filter
S9	Player Detail	/players/[slug]	Career stats, current team, recent matches
S10	News Feed	/news	Aggregated esports news with search
S11	404 Not Found	*	Custom error page

Proposed New Screens

#	Screen	Route	Purpose
S12	Tournament Registration	/tournaments/[slug]/register	Step-by-step tournament sign-up flow
S13	Live Scoreboard	/matches/[id]/scoreboard	Full-screen real-time scoreboard for a match
S14	Player Stats Deep-Dive	/players/[slug]/stats	Charts, graphs, advanced performance analytics
S15	Tournament Brackets	/tournaments/[slug]/brackets	Visual bracket / group-stage view

4. Key Page Content Specifications

4.1 Tournament Registration Page (/tournaments/[slug]/register)

← Back to Tournament

▶ Tournament Name & Logo

▶ Game • Date • Prize Pool • Region

— Step 1: Choose Entry —

○ Solo Registration

○ Team Registration

— Step 2: Team Info (if team) —

Team Name: [_____]

Team Tag: [___]

Players: + Add Player (via search)

— Step 3: Confirm —

Rules acceptance checkbox

Summary card – team, players, tournament

[Register]

— Step 4: Success —

✓ Registration confirmed

Tournament starts in X days, Y hours

[View My Team] [Back to Tournament]

Data needed: Tournament details (API), user/team info (auth required).

4.2 Live Scoreboard (/matches/[id]/scoreboard)

LIVE	CS2 • B03	Map 2/3
Team A [logo]	13:9	Team B [logo]
Map Scores: Inferno 16-12 Nuke 13-9		
- Round-by-round timeline (visual bar) - Economy tracker (buy/eco/force rounds)		
— Player Stats (current map) —		
Player	K	D A ADR Rating
----- ---	---	----- -----
s1mple	23 15 4	92.3 1.42
...		
[Watch Stream]		

Data needed: Live match endpoint (PandaScore), 15s polling.

4.3 Match Details Page (/matches/[id]) – Enhanced

Match Status Badge (LIVE / UPCOMING / DONE)
Team A vs Team B Logo • Name 2 : 1 Name • Logo
Tabs: [Overview Maps Stats Streams]
Overview Tab: - Tournament name + link - Best-of format - Scheduled / played date & time - VOD links (if finished)
Maps Tab: Per-map score cards with map name/image
Stats Tab: - Player performance table (KDA, rating) - Head-to-head history
Streams Tab: - Embedded Twitch/YouTube player - Alternate language streams

4.4 Team Profile Page (/teams/[slug]) – Enhanced

[Team Logo] Team Name

Region • Game • World Rank #X

Win Rate: 68% (last 3 months)

Tabs: [Roster | Matches | Tournaments]

Roster Tab:

- Player cards (photo, role, nationality)
- Coach / substitute info

Matches Tab:

- Recent results with opponent & score
- W/L streak indicator
- Filterable by game/timeframe

Tournaments Tab:

- Past tournament placements (table)
- Prize earnings total

4.5 Player Stats Page (/players/[slug]) – Enhanced

[Photo] Player "Nickname" Name

Team Logo • Team Name

Country Flag • Age • Role

— Key Stats —

Rating

K/D

Win Rate

Maps

1.21

1.34

62%

487

— Performance Trend (line chart) —

Rating over last 3 / 6 / 12 months

— Match History —

Date | Tournament | Opponent | Score | KDA

... paginated list ...

— Achievements —

🏆 Major wins, MVP awards, top placements

```

User Flow Narratives

Flow 1 — Fan Checking Live Scores

Homepage → Matches List → Match Detail → Live Scoreboard → Watch Stream

Flow 2 — Player Registering for a Tournament

Homepage → Tournaments List → Tournament Detail → Registration (Step 1–4) → Confirmation

Flow 3 — Researching a Team

Homepage → Teams List → Team Profile → Player Detail → Player Stats Deep-Dive

Flow 4 — Quick Search

Any Page → 🔑 Search → Jump to Match / Tournament / Team / Player

6. Summary

The existing **e-scores** app already covers the core read-only esports tracking experience (matches, tournaments, teams, players, news) using PandaScore API data. The primary gaps for a complete e-sports application are:

Gap	Priority	Complexity
Tournament Registration flow	High	Medium — requires auth system
Dedicated Live Scoreboard view	High	Low — extends existing match data
Player Stats visualizations (charts)	Medium	Low — add charting library
Tournament Bracket visualization	Medium	Medium — bracket rendering logic
User Auth & Favorites	Medium	High — backend + state management
Stream embedding	Low	Low — iframe integration
Push Notifications	Low	High — service worker + backend
